What happens when two leaders meet each other?

In the business world ideas and experiences are exchanged and innovative projects come to life with the quality guarantee that just two leaders can offer you.

In the business world ideas and experiences are exchanged and innovative projects come to life with the quality guarantee that just two leaders can offer you. This is how Fleet Management has been created, partnering with Geotab, a company leader in the management of vehicle fleets.

What does it mean for our clients?

We know exactly what you need, no matter if your most important activity is transport (commercial transport, logistics, production, rental or roadside assistance) or your vehicle fleet is an essential asset for your business (commercial workforce, taxi companies, public service). This is why we want to offer you a turn-key, end-to-end and professional solution that allows you to optimize your fleet management by responding to all needs related not only to the safety of your employees, vehicles and assets, but also to cost reduction, productivity and sustainability.

Welcome to Fleet Management, our global solution that goes hand in hand with your needs.

The solution includes eight products adapted to the needs of every company. The products are web-based and work not only in combination but also independently. They are designed to resolve any difficulty a company with a vehicle park may find. Your fleet management will be simplified thanks to an easily accessible digital platform and dynamic reports.

Visualization

Know at anytime the geographic position of your fleet to **assure compliance with routes and schedules.**

- **Advanced Tracking**

Optimizes travel time, mileage and vehicle running costs through real-time geolocalization.

Protection

Reduce labor risks, comply with health regulations and prevent theft, **enforcing at the same time the safety of employees, passengers, vehicles and goods.**

- **Warning & Attention**

Enhances safety of employees and vehicles on the road using an alert and alarm system.

- **Risk Control**

Helps to manage labor risks through analysis of routes, schedules and driving styles.

- **Duty of Care**

Assures legal compliance regarding health and safety.

Productivity

Obtain tools to control routes and work processes, **enabling you to reduce work hours and to achieve an important fuel cost reduction.**

- **Data Analyzer**

Enables to take strategic decisions based on an exhaustive workflow analysis.

- **Business Optimization**

Improves your business profitability by integral management of your fleet.

- **Expenses Control**

Allows a precise supervision and control of taxes and expenses.

Sustainability

Modify the driving style of your employees **to reduce CO² emissions and to comply with environmental norms.**

- **Driving Efficiency**

Helps to reduce fuel consumption by managing driving styles.

With the advantages of Telefónica Fleet Management you'll have in your hands all the control over your vehicles.

Our **solutions are individual, turn-key**, modular, configurable in various languages and extendable to the needs of our clients.

Telefónica offers you **connectivity in every part of the world.**

All **data is obtained automatically.**

Round-the-clock telephone support in 12 languages.

Optional **consulting and training services.**

Installation and maintenance at any place and time your business may require.

Broad range of on-board devices for all your possible needs.
